www.euroironworks.com

European Wrought Iron Works offers two generations of experience in the design and fabrication of a wide variety of wrought iron products including fencing, gates, doors and all types of railings.

Our well trained sales personnel will be able to answer all your questions about technical and design issues. Our capabilities in design and fabrication are not limited to any particular architectural style, we can produce work from the traditional "old world" european style to the ultra modern industrial architectural style. We can also work with a great number of metals and other materials, such as: wrought iron, stainless steel, bronze, brass, aluminum, nickel, glass, cast iron, malleable iron, acrylic, and granite.

We love our Wrought Iron

A proud member of **NOMMA**, that is National Ornamental and Miscellaneous Metals Association. Allow our vast experience to work for you, assisting the novice or professional designer to create a truly unique and exceptional quality product.

Our metal works library is available to any customer searching for information in our field. We have dozens of books, videos and hundreds of pictures of metalworks from all over the world.

European Wrought Iron Works

Steel Gate Fabrication

Another critical component is the gate fabrication itself. Our well engineered gates help ensure structural integrity, that minimizes vibrations at even the largest of gate openings. Reducing the risk of any potential problems down the road.

Estate Security

Taking into consideration your specific site conditions and requirements, **European Wrought Iron Works** can provide everything from and including telephone entry systems, auxiliary key pads, cameras, D.V.R.'s, lighting, surge protection, emergency access and safety photo cell and vehicle loop detection. As well as many other essential components for your residential and commercial requirements. Ask about the new S.O.S. standard.

Now available, professionally engineered Autocad electrical schematics for your complete gate automation needs.

Canadian Winter Tested

Extremes in temperature requires specialized design and fabricating techniques that can withstand our extreme climate changes. **European Wrought Iron Works** vast experience is an industry leader with the hundreds of gates designed and built over the years. Attention to detail in both design and fabrication will ensure customer satisfaction. One of the first to introduce Autocad drawings to the residential ornamental wrought iron market, this has allowed us to provide our clients with an accurate scale of drawings of their new custom gate or railings.

patent pending

Let us show you how to add a level of security, in elegant and sophisticated manor. **European Wrought Iron Works** offers a wide range of wrought iron gates to satisfy even the most demanding requirements. State of the art gate operators available in a wide range of models. Most models available with hydraulic locking in open and closed position. All models have exclusive anti-crushing protection and customized emergency key release.

Columns

The key to success is careful planning and consideration to electrical rough in. These items are critical especially when columns are part of your gate system. For this reason, we have developed our own precast concrete column. (*patent pending*) Traditional in design, available in a variety of colours. Can be sandblasted to give the appearance of nature stone but without maintenance issues. Within the solid cement column are found many of the critical components that include the roughed in electrical work and engineered steel post and base plate. They are available as a kit ready to ship or allow us to provide a complete turn key system.

Bearing Hinges

Virtually maintenance free roller bearing hinges are used to provide a effortless and smooth movement of your gate. This works well in all climate conditions. FAC SRL are known as the world's best hinges. Do not accept anything less.

Foundations

Properly engineered cement foundations are the key to a stable gate. Cutting corners here may lead to disappointing gate performance in the near future. A keyed foundation may also be required in some cases where water tables and elevations are a factor. Speak to a representative, to know what is right for you.

European Wrought Iron Works

Craftsmanship

Custom fabricated in our factory. A wide variety of styles and heights of fences and railings that can conform to local bylaw building code and pool requirements to fit almost any budget. Low maintenance, hot dip galvanize also available.

Custom Gazebos

Allow **European Wrought Iron Works'** artisans to create a masterful, one of a kind creation. Let our courteous and friendly staff help make your dreams into reality.

Commercial Architectural Metal Work

Importers of large variety of goods including pickets, leaves, prefab gates, front entry doors and bronze art.
